

## RAINBOW CITY

Words and Music by Linda Arnold

In a Rainbow City underneath the sea

Coral animals grow their homes together happily

All these beautiful coral homes

Become the living foundation stones

For a growing Rainbow City underneath the sea

Red, green, yellow, blue

Purple, orange, too!

Such a colorful place to be

Where the creatures all live tropically

In a Rainbow City underneath the sea

Nature's magic creatures build

A coral colony

In this crowded neighborhood underneath the sea

Many fish and animals share

The coral colony

Every creature must find their place

A nook, a cranny or a sandy space

While others cruise the neighborhood

Around the coral reef

If you visit there

Please take extra care

Look before you kick your feet

Or you just might crumble someone's street

In a Rainbow City underneath the sea

Many wonderful animals share

The coral colony

Rainbow City, Rainbow City, Rainbow City

Such a colorful place to be

Where the sun shines down all day

Underneath the sea

Coral animals grow their homes together happily

When the water is shallow and clean

Their habitat is a healthy scene

For the coral need strong sunlight

To grow with all their might

Rainbow City, Rainbow City, Rainbow City

The colorful, crowded coral reef colony
