

COUNT WITH ME

Words and Music by Linda Arnold

Count with me and I'll count with you
Nine take away four is five
Eight take away six is two

Count with me and I'll count with you
Nine take away four is five
Eight take away six is two

Well, I don't mind telling anyone
That when I solve a problem right, it's just so fun!

Count with me and I'll count with you
Nine take away four is five
Eight take away six is two

Well, two plus two is...four
And four plus four is...eight
And ten plus eleven is...twenty-one
There's no denying it, it's just so fun!

Count with me and I'll count with you
Nine take away four is five
Eight take away six is two

Well, three take away three is...zero
And seven take away five is...two
And a hundred take away forty-nine is...fifty-one
There's no denying it, it's just so fun!

Count with me and I'll count with you
Nine take away four is five
Eight take away six is two

Well six times two is...twelve
And four times four is...sixteen
And nine times nine is...eighty-one
There's no denying it, it's just so fun!

Count with me and I'll count with you

Nine take away four is five

Eight take away six is two

Nine take away four is five

Eight take away six is two!
